MAP 1: NH COASTAL ZONE PROGRAM

The New Hampshire Coastal Program provides staff assistance and funding to 42 coastal towns and cities as well as other local and regional groups to help protect clean water, restore coastal habitats, and help make communities more resilient to flooding and other natural hazards. The NHCP is one of 34 federally approved coastal programs authorized under the Coastal Zone Management Act and is administered by NHDES. The NH Coastal Program was established under Section 309 of the Coastal Zone Management Act (CZMA), as amended. The program encourages state coastal management programs (CMPs) to strengthen and improve their federally approved coastal management programs related to wetlands, coastal hazards, public access, marine debris, cumulative and secondary impacts, special area management plans (SAMPs), ocean/Great Lakes resources, energy and government facility siting, and aquaculture (CZP Map)
