Town Boundaries Shoreline; Stream Interstate Water Feature Apparent Wetland Limit US Route Tidal Feature Intermittent Stream State Route Town Boundaries Other Surface Water Feature Local Critical Facilities This dataset was created through several efforts. Many of these points were identified during to mergeney planning process with local input by where available. The NH Broadband Mapping and Planning Procentributed data to this dataset. Water and Sever Service Areas were provided by the NH Department of Environmental Services. These areas a pproximate and were derived from buffering road centerline features by a constant distance for streets having we sever or both services available. RPC extends every effort to ensure map data is carrent and complete, however, errors do happen. Place let us know if you spot errors or omissions. Recent and Sever Service Areas were provided by the NH Department of Environmental Services. These areas a sproximate and were derived from buffering road centerline features by a constant distance for streets having we sever or both services available. Recent and Sever Service Areas were provided by the NH Department of Transportation the USGS Digital Lin Graph data, 124000, as archived in the GRANIT database at Complex Systems Research Center, here the Study of Dath, Decenare and Space, University of New Hampshire, Durhan, NH; 1992-2012. The within the Rockingham Planning Region have been updated by NH Department of Transportation the tord insport so for general or scientific purposes, nor Shall the act of distrintuin constitute any such warranty.
